Field key to the "Inventory of complete NASA TR-R series including online availability or lack thereof via NASA Technical Reports Server"

- Report Number
  - The report number assigned to the report by the National Aeronautics and Space Administration. A Superintendent of Documents (SuDocs) number for each report can be derived by substituting the SuDocs stem "NAS 1.12:" for the NASA report number stem "NASA TR R-". For example, NASA TR R-1 would be NAS 1.12:1.
- Document ID
  - When available, this is the Document ID from the field of the same name in the record for the report at the NASA Technical Report Server (NTRS) . The presence of a Document ID indicates online availability of the report at NTRS. The absence of one indicates the absence of a record and the absence of a file for the report at NTRS.
- Posting Date
  - When indicated, this is the date that the file for the reports was posted to NTRS. It corresponds to the Date Acquired field in NTRS.
- Pub Date
  - When indicated, this is the Publication Date of the report. The publication date may be a month and year or just a year. The lack of a publication date indicates the lack of the metadata due to a report that is:
    - Not online at NTRS
    - Not indexed in the paper Catalog of Government Publications
    - Not indexed in the online Catalog of Government Publications
    - Unavailable physically
- CGP Date
  - When indicated, this is the Month and Year when a record appeared for the report in the print Catalog of Government Publications. Reports that lack metadata in this field made no appearance in the CGP.
- CGP Page
  - When indicated, this is the page where a record for the report appears in the CGP issue indicated in the CGP Date filed for the report
- CGP Price
  - When indicated, this is the cost for a member of the public to purchase the report from the United States government. It comes from the record in the print CGP issue indicated in the CGP Date field for the report
- Vendor
  - When indicated, this is the United States government agency from which the public was able to purchase the report
- Item Number
  - When available, the Superintendent of Documents Item Number appears in this field. When an Item Number is indicated, the metadata came from the print Catalog of Government Publications and indicates that the report was distributed to libraries that were participating in the Federal Depository Library Program (FDLP) at the time of distribution.
- Online Record in:
  - The availability of a record for the report in the online Catalog of Government Publications is indicated by the catalog.gpo.gov url.
